

Chiropractic Business OS Demo Script

Opening

This is a simple dashboard for tracking patient inquiries and follow-ups. It is not replacing your EHR or scheduling system.

Dashboard

Show Total Patient Inquiries, Follow-Ups Needed, Overdue Follow-Ups, Active Patients, Estimated Treatment Value, and Conversion Rate.

Patient Inquiries

Add a fake inquiry, then update an existing inquiry to Consultation Scheduled or Active Patient.

Weekly Summary

Review the Practice Performance Snapshot and explain what the numbers mean in plain language.

Export

Show patient-friendly CSV exports for inquiries and follow-ups.

Close

Ask whether this would help the owner or front desk avoid missed follow-ups.

Prepared for Chiropractic Business OS outreach. Demo data should remain fake unless a production compliance plan is in place.
