

# Chiropractic Business OS Demo Script

## Opening

This is a simple dashboard for tracking patient inquiries and follow-ups. It is not replacing your EHR or scheduling system.

## Dashboard

Show Total Patient Inquiries, Follow-Ups Needed, Overdue Follow-Ups, Active Patients, Estimated Treatment Value, and Conversion Rate.

## Patient Inquiries

Show the fake sample inquiries, diverse statuses, requested services, and follow-up dates.

## Weekly Summary

Review the Practice Performance Snapshot and explain what the numbers mean in plain language.

## Export

Show patient-friendly CSV exports for inquiries and follow-ups.

## Close

Ask whether this would help the owner or front desk avoid missed follow-ups.

*Prepared for Chiropractic Business OS outreach. Demo data should remain fake unless a production compliance plan is in place.*
