

Chiropractic Business OS: One-Page Offer

Headline

See chiropractic patient inquiries, follow-ups, and estimated treatment value in one simple Practice Performance Dashboard.

Problem

Inquiries from Google, referrals, insurance questions, website forms, and phone calls can get scattered across notes, inboxes, spreadsheets, and memory. That makes follow-up inconsistent and open treatment value harder to see.

Solution

The Chiropractic Business OS helps a practice owner track inquiries in one place, improve follow-up consistency, and review weekly practice performance without replacing the EHR or scheduler.

Deliverables

- Patient inquiry intake
- Practice Performance Dashboard
- Follow-up tracking
- Weekly Practice Summary
- Patient-friendly CSV exports
- Demo data and setup documentation

Who This Is For

- Solo chiropractors
- Small chiropractic practices
- Offices using spreadsheets
- Practices struggling with follow-up consistency

What This Is Not

- Not an EHR
- Not billing software
- Not insurance software
- Not scheduling software

Simple ROI Example

Example only: 10 inquiries/month, 2 missed opportunities, 1 recovered patient opportunity, potential value recovered through better follow-up visibility. No revenue outcome is guaranteed.

Onboarding Timeline

- Setup

- Data Import
- Training
- Go Live

Support Options

- Onboarding support
- Training support
- Monthly review support
